-

PROJECTS

E-commerce Web Application

Created a responsive, secure, and modern e-commerce website with integrated Stripe payment system. Technologies used: React.js, Node.js, Express, and MongoDB.

Employee Leave Management Mobile Application

Developed with Android Studio, this application allows employees to manage leave requests and approvals through an intuitive interface with real-time tracking features.

Hotels booking platform

Built a scalable hotel booking platform using a microservices architecture with technologies including React.js, Node.js, NestJS, and PostgreSQL, featuring event-driven communication via Redis and full-text search with Elasticsearch. Implemented secure payment processing with Stripe and PayPal.
